## ABOUT ME

A motivated Information Science Engineering student with nearly **one year of hands-on experience in frontend development**, specializing in **React.js and Next.js**. I have worked on real-world production projects like **Dokterz**, implementing scalable UI components, state management using **Redux Toolkit**, and efficient data handling with **React Query**. I enjoy building clean, user-focused interfaces, integrating REST APIs, and continuously learning modern web technologies to deliver high-quality applications.

## EDUCATION

**Adichunchanagiri Institute of Technology**, Chikkamagaluru  
Bachelor of Engineering in Information Science , cgpa-8.23

Nov2021–May2025

**Vikasa PU College Alkola**, Shivamogga  
PUC , Percentage-80%

June2019-May2021

**Navajyothi English Medium School**, Konanduru, Shivamogga  
SSLC , Percentage-84%

June2018-May2019

## PROJECTS

**Phishing Attack Detection and Prevention** | Python, Django, SQL

Jan2024

Developed a cybersecurity application to **detect and prevent phishing attacks** by analyzing URLs, emails, and website attributes using **machine learning techniques**. Implemented feature extraction for identifying suspicious patterns, integrated the detection model into a **Django-based web application**, and used **SQL** for secure data storage and reporting. The system helps enhance **user safety and secure online transactions** by blocking malicious links in real time.

**Credit Card Fraud Detect** | Python, Matplotlib, Git

May2024

Developed a fraud detection system to **identify suspicious credit card transactions** by analyzing transaction patterns and detecting anomalies in both **online and in-store purchases**. Applied data analysis techniques in **Python** to recognize unusual spending behavior, visualized trends and anomalies using **Matplotlib**, and tracked development using **Git** for version control. The system helps reduce fraudulent activity and improve transaction security.

**Portfolio Based** | HTML/CSS, JavaScript

Nov2024

Which helps to store the Skills, Achievements

Done from the basic things which had learnt from HTML/CSS, JavaScript.

## SKILLS

Python | HTML/CSS | SQL | Java Script | Reactjs | Nextjs

Proficient in building responsive web applications, managing data with SQL, developing scalable frontend solutions using React and Next.js, and writing clean, efficient logic in Python and JavaScript.

## Internship Experience

### Internship in FrontEnd Development

Jan2025-Present

Ideafloats technologies Bangalore

- **Dokterz – Healthcare Practice Management System**
- ✓ **Frontend Development (Next.js / React)**

- Developed scalable and production-ready frontend features for **Dokterz**, a healthcare platform for **clinic operations, patient management, and appointments**, using **Next.js and React.js**.
- Implemented **global state management using Redux Toolkit** for application-wide data and **React Query** for efficient server-state management, caching, and API synchronization.
- Integrated **RESTful APIs using Axios**, handling authentication, CRUD operations, loading states, and error handling.
- Built **responsive, reusable UI components** aligned with real-world healthcare workflows such as patient records, scheduling, and dashboards.
- Collaborated with backend teams to ensure **smooth API communication, data consistency, and reliable application behavior**.
- Optimized performance and improved **user experience across dashboards and patient management modules**.
- Gained hands-on experience with **modern frontend architecture**, component-based design, and scalable state management patterns.
